EXPERIENCE

Web Engineer (Contract)

Catalyst

📅 July 2023 - July 2024   📍 Durban, ZA

Catalyst is a leading app development company specializing in creating innovative, bespoke, best-in-class mobile applications.

My role here was to help deliver on the web part of their business also to assist others with their workflow.

TypeScript, Next.JS, Magento, Graphql

Senior Software Engineer

411gen - Influencer Commerce

📅 Nov 2021 - Mar 2023   📍 Durban, ZA

SaaS product to provide a solution for making use of social media marketing to drive sales, and first-party leads and optimize conversion rates.

Ruby on Rails application and my role here was to build on top of this bespoke application. Adding new features, and integrating with Shopify, Salesforce and a few other services.

Ruby, RoR, Docker, Kubernetes, AWS

Certifications

- 💎 National Senior Certicicate
- 💎 TypeScript
- 💎 Ruby on Rails

Skillset

LAMP, MEAN, MERN, MEVN, RoR

Senior Web Engineer

Planet54.com

📅 July 2017 - Mar 2023   ⊙ Durban, ZA

Planet54 was on an online e-commerce site. Offering their customers the latest local and international fashion trends.

Powered by Shopify my role here was very diverse. From Shopify theme and app development, integration with 3rd party services to API design for internal usage to being a team leader guiding my colleauges.

Shopify, Ruby, Magento, React, Express, Graphql, Firebase, WordPress, PostgreSQL

Front-end Developer

ThreeZee (Enhance Enterprise)

📅 Mar 2016 - July 2017   ⊙ Durban, ZA

ThreeZee was an online platform where our customers could build their online store using pre-designed, pre-coded themes.

My role here started as a front-end developer, writing plugins and themes for WordPress but once I got comfortable started getting into DevOps, learning how to stage a VPS and load balancing and all the good stuff that we use now to ship a product. I also was given the freedom to explore emerging frameworks. AngularJS, Vue.JS, React, Slim, Laravel, Symfony.

WordPress, DevOps

Front-end Developer

Electrik Design Agency

📅 Mar 2014 - Feb 2016   ⊙ Durban, ZA

Electrik was a design agency that offered design, print and web development as a service.

My role here started as a junior developer but then quickly grew to developer and then senior developer. I was responsible for the development and maintenance of the majority of the clients, Writing email templates and SEO. It is here that I gained the experience of what it is to be a front-end developer, learning how to use build tools, preprocessors, and WordPress development.

HTML, HTML5, CSS, SCSS, SASS, Grunt, Gulp, WordPress, PHP, JavaScript, jQuery, Git, YAML
